1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on *** has been entered.

2. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Masahisa et al (translation of JP 09-139877).

With regard to claim 1, Masahisa discloses an electronic camera including an image pickup element CCD (Figs. 1-3) that comprises the connector that is connectible with an electronic

apparatus, said connector being directly provided on the image pickup device without an external cable (electronic camera 2 comprises connector 11 that is used to connect camera 2 to an electronic device such as memory card 3, [0031] to [0035], wherein the connection between camera 2 and card 3 does not have any external cable as shown in Fig. 1), reinforcing portion that is located near said connector and reinforces said connector when said electronic apparatus (tongues 11a and 11b are used to hold connector 11 on memory card 3 via corresponding stop holes 8a and 8b, thereby to reinforce the connector 11 and located near the connector 11), and said connector and reinforcing portion being independent and separate members (connector 11 and tongues 11a and 11b are working independent and separate members as shown in Fig. 2).

4. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 3-6 and 9-12 are allowed.
